F-55 HEAVY DUTY DRAINAGE GATE

- CAST IRON CONSTRUCTION
- AUTOMATIC OPERATION
- 55 FOOT SEATING HEAD MAXIMUM

Model F-55 Gates are furnished with a flangeback frame. Frame, cover (flap) and adjustable hinge blocks are cast iron. Standard hinge links are flame cut steel or ductile iron. Assembly bolts, hinge pins and keepers are type 304 stainless steel. Hinge bushings are bronze.

Gate features a minimum of 2%° seat incline to assure positive closing. Finished seating faces are machined to a flat plane within .002 T.I.R.

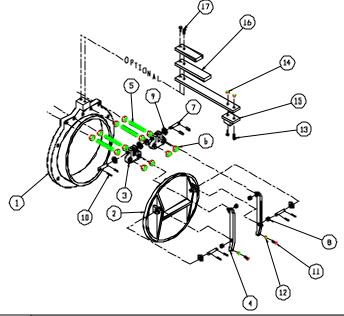

Optional dovetail bronze seat faces, stainless steel seat faces, and a dovetail neoprene seat in either the cover or frame are available. A leaf spring bumper with rubber cushion block can be furnished when the gate is used on pump discharge lines.

Other Optional Items Include:

- Ni-Resist frame, cover and hinge block
- Type 304 or 316 stainless steel links
- Manganese bronze hinge links
- · Non-metallic hinge bushings
- Type 316 stainless steel assembly hardware
- 125 lb. ANSI standard drilling
- Permalube Bronze Bushings
- Special paint coatings
- Total Galvanizing
- Lube Fittings

PARTS LIST

- 1. 25 Lb. & 125 Lb. Std. Drilling available on request for all gates except 15" & 21".
- 2. For use with seating heads up to 55 feet. 108" gate suitable for use to 30Ft. only.
- 3. "F" Dimensions are machined dimensions, may be 1/4" thicker.
- 4. If grout pad mounting is used, add grout thickness to dimension.

TYPICAL SPECIFICATIONS F-55 HEAVY DUTY AUTOMATIC DRAINAGE (FLAP) (TIDE) GATES

General

The drainage gate shall be designed to allow free outflow and prevent backflow for maximum seating heads up to 55 feet. Gates shall be Waterman Model F-55 or equal.

Construction

The frame shall be cast iron of flatback design with machined seating surface inclined from vertical, at minimum of 2½°, to assure positive closure. For flatback gates mounted to thimbles or flanges, the gate flange shall be machined and drilled to match.

The cover shall be cast iron, cast in one piece, with reinforcing ribs, designed to withstand the seating head specified. An integral cast on lifting eye shall be provided for manual operation.

Seating surfaces for frame and cover shall be:

a) Machined iron

or

b) Bronze seats impacted into dovetail grooves on frame and cover

OI

c) Bronze seats impacted into dovetail grooves within frame with neoprene seat bonded into dovetail groove in cover to cushion cover on closing

or

d) Bronze seats impacted into dovetail grooves in cover with neoprene seat bonded into groove in frame.

All machined seats shall have a minimum 63 microinch finish.

The gate shall be provided with adjustable, double pivoted hinge links so designed to permit complete seating, full opening, and with stops or other arrangements to prevent cover from rotating sufficiently to become wedged in the open position. Pivot lugs mounted to frame shall be adjustable to allow adjustment of hinge links without having to remove cover from gate. The hinge links (arms) shall be bronze-bushed galvanized structural steel. Optional hinge links of ductile iron, stainless steel (both bronze-bushed), and manganese bronze may be specified.

All assembly hardware and hinge pins shall be Type 18-8 stainless steel.

Finish

All cast iron shall be painted with manufacturer's standard shopcoat paint (or special paint). Structural steel hinge links shall be galvanized. All bronze and stainless steel parts do not require further finish.

Materials

Frame and Cover - Cast Iron per ASTM A-126, Class B.

Pivot Lug - Ductile Iron per ASTM A-536, Gr. 65-45-12.

Hinge Link - Structural Steel per ASTM A-36, galvanized per ASTM A-123.

Bronze Bushings and Washers - Commercial Bronze.

Assembly Hardware and Hinge Pins - 18-8 Stainless Steel (Type 304).

Optional Materials

Naval Bronze Seats - ASTM B-21, Alloy 482.

Low-Zinc Bronze Seats - ASTM B-139.

Neoprene Seats - ASTM D-2000 BC610/625.

Ductile Iron Hinge Link - ASTM A536, Gr. 65-45-12.

Manganese Bronze Hinge Link - ASTM 584, Alloy 865.

Stainless Steel Hinge Link - ASTM A-276, Type 304

Bronze Hardware - ASTM B-98.

Ni-resist Cast Iron Frame and Cover - ASTM A-436, Type 2 or 2B.

F-50 HEAVY DUTY DRAINAGE GATE

- CAST STEEL DESIGN
- AUTOMATIC OPERATION
- 50 FOOT SEATING HEAD MAXIMUM
- MODEL F-50F FLATBACK FOR WALL MOUNTING
- MODEL F-50SB SPIGOTBACK FOR MOUNTING TO CORRUGATED PIPE
- MODEL F-50C FOR MOUNTING TO CONCRETE PIPE

Model F-50 Gates are designed for use in drainage, flood control, and similar projects with seating heads up to 50 feet and where slamming, tidal action, ice or debris may necessitate a gate with high resistance to damage from impact. A minimum 2½ o seating angle assures that gates will not "hang open" even if pipe sags slightly or mounting is not on a perfectly vertical plane. This gate opens with minimum differential head, but ensures positive closing.

The frame and cover are commercial quality cast steel. Links are fabricated from heavy duty angle or steel flat bar with bronze hinge bushings. Hinge pins, washers and keepers are stainless steel.

The non-jamming design eliminates the need for additional bars or lugs. The lifting eye is cast as an integral part of the cover (flap).

Seating surfaces are machined steel, with bronze or stainless steel seat faces available as options. A neoprene dovetail seat face, recessed in the cover to minimize damage from debris, is an additional option.

OPTIONAL ITEMS

- Special paint, coatings, and galvanizing per ASTM A-123
- Bronze, stainless steel and neoprene cushion seat faces
- Galvanized or stainless steel anchor bolts
